RAJAN MAHARJAN

iOS Developer

+977-9860124285
rajanmaharjan123@gmail.com
https://www.linkedin.com/in/rajan1122/

A highly motivated iOS Application Developer with Five years of experience in designing, developing, and deploying applications for the iOS platform. Experienced in mobile application architecture and comprehensive software development. Additionally skilled in using Flutter for cross-platform mobile development. Demonstrates exceptional analytical and problem-solving abilities, coupled with a swift adaptability to emerging technologies.

WORK EXPERIENCES

Freelancer
Nov 2024- Present

iOS Developer | Flutter Developer | Robotics Instructor

- Developed a traditional dice game with 3D dice shaking and clean Swift/ UIKit interface.
- Built a 3D scanning app that converts spaces into 2D room layouts with evacuation planning and export features.
- Built a 3D scanning app that provides 3D room layout with its Dimensions on Upwork.
- Led hands-on sessions on Arduino and IoT with ESP, guiding students in building real-world robotics projects over one month.
- Coordinated with remote project teams and task as per objectives.
- Researched & worked with professional developers to complete insurance calculator, intregating esewa, khalti and prabhu pay and QR scan application
- Made text to video app (i.e. ,ImaginAI) with Flutter , which takes prompt from user which generate voiceover script , then attach it to video generated with the prompt
- Designed and developed a focus mode feature for the Norvic Reset app using Flutter, allowing users to lock the app for customizable durations across multiple sessions and force the device to remain on a single app screen for uninterrupted productivity.
  Worked on Ad analysis app (i.e. ,Ad monkey)

Projects *-*
*i**OS Projects** : GIC Insurance,, BigFanz Business, BIgFanz customer, SIMAPP(SwiftUI),Tarmac(SwiftUI),EvacPlan(SwiftUI),LidarScanner(SwiftUI), Norvic Reset(SwiftUI)*
***Flutter Projects**: ImaginAI, Admonkey, Everest Grocery*

Sajilo Saathi
Aug 2023- Present

Senior iOS Developer

- Led the complete revamp of both User and Driver ride-sharing apps as Senior iOS Developer, single-handedly architecting and coding the entire transition from a legacy codebase to a modular, high-performance architecture.
- Resolved critical issues in map rendering, real-time tracking, and payment integration while personally optimizing every component for battery efficiency and accuracy.
- Redesigned booking flows, earnings dashboards, and rating interfaces from scratch to deliver a polished user experience. Through direct, hands-on coding and systematic bug resolution, elevated User app rating from 2.8 to 3.7 stars and Driver app rating from 2.2 to 2.8 stars.

Projects *-*
Sajilo - Nepali Ride Sharing App, Sajilo Rider- Driver App

Vanilla Tech
Sep 2023- Nov 2024

iOS Developer | Flutter Developer

- Revamped iOS Idemia SDK, segregating, resolving issues, and ensuring seamless integration.
- Rectified compatibility issues and upgraded the framework to XCFramework for the KIBB iOS SDK, ensuring optimal performance and efficiency.
- Leveraged Flutter's Stacked state for a sophisticated Tourism App, showcasing refined UI designs and seamless development.
- Enhanced Flutter app with personalized currency features and intuitive reordering.

Projects *-*
iOS Projects : Merchantrade Money, Ewallet Malaysia, IDEMIA SDK, KIBB SDK
Flutter Projects: Merchantrade Money Biz, Enrich Money, Tourism App

Treeleaf Technologies
Aug 2021 - Sep 2023

iOS Developer

- Developed a real-time messaging chat system for seamless communication between users.
- Created a ticket management system to efficiently track and resolve customer issues.
- Implemented a meeting calendar and scheduling functionality for improved organization and time management.
- Utilized MQTT (Message Queuing Telemetry Transport) protocol for efficient and reliable data transfer.
- Implemented protocol buffer serialization to optimize data transmission and reduce overhead.
- Identified and resolved memory leaks and managed memory efficiently to ensure optimal app performance.
- Designed and implemented user interfaces programmatically using UI Kit.

Projects *- Anydone*

YarshaSoft pvt ltd
Aug 2020 - Aug 2021

Flutter Developer

- Designed and developed a school management system app and NVA app. Successfully published the app on the PlayStore.
- Integrated APIs to enhance the functionality and connectivity of the app.
- Implemented push notification feature, enabling real-time communication with app users.
- Conducted thorough testing and debugging to identify and fix any software issues.

Projects *- Ganesh Himal School, IJ Pioneer School, NVA ….*

OkayJourney pvt ltd
Jun 2020 - Aug 2021

Flutter Developer Intern

- Design OkayJourney and Muskan app on Adobe XD.
- Learned app architecture and pattern UI/Ux Design .

Projects *- Okayjourney, Muskan*

GBS Team
Apr 2019 - Oct 2019

Team Member

- Contributed as a team member in the development of a bomb disposal robot for the army.
- Successfully completed multiple robotics projects, demonstrating expertise in various aspects of robotics .
- Worked on a diverse range of drone projects, including surveillance, leveraging skills in drone design and flight control systems.

Projects *- Swabhiman, Multiple drone projects, UAV , UGV*

Prerana Vidhyashram
Apr 2019 - Oct 2019

Robotics Teacher

- Conducted classes and workshops on robotics and guidance to students on various robotics concepts, principles, and technologies.
- Assisted and mentored students in completing their automation and robotics projects, taught Arduino programming, covering topics such as sensor integration, motor control, enabling students to develop their own projects .

Personal Projects

Langur Burja

Langur Burja (Jandu Munda)

- Developing a digital version of the traditional Nepali dice game Langur Burja.
- Implemented dice roll via shake detection and button press.

Magi3D

Object Capture app - capture 3d object and share

- Developed an iOS app that create 3d module using RealityKit ObjectCaptureSession to create 3d object from mobile scan of any object

EDUCATION

Bachelors
2015-2019

National College of Information & Technology (NCIT)
Bachelor in Electronics and Communication

PARTICIPATION & ACHIEVEMENTS

Team Member
Aug 2019

Swabhiman
Played a vital role as a team member in successfully developing a bomb disposal robot for the army, contributing to the enhancement of national security and the safety of military personnel.

Event Organizer
July 2019

Next Expo
Organized and conducted hardware and robotics events, overseeing event planning, coordination, and execution, ensuring successful and engaging experiences for participants

Event Organizer
2015-2019

National Mechanical Exhibition
Successfully developed and piloted an Aqua-bot, leading to a remarkable victory in a competition or contest, showcasing exceptional skills in both technical development and piloting.

Languages

Nepali(Native),
Newari(Native),
English(Fluent),
Hindi(Intermediate).

Interests

Football , Traveling and Video Games
